| 2 ( | a) Findings | —Congress | finds | the | following: |
|-----|-------------|-----------|-------|-----|------------|
|-----|-------------|-----------|-------|-----|------------|

- (1) The use of computers and the Internet is rapidly transforming societal interactions and the relationships among citizens, private businesses, and the Government.
  - (2) The Federal Government has had uneven success in applying advances in information technology to enhance governmental functions and services, achieve more efficient performance, increase access to Government information, and citizen participation in Government.
  - (3) Most Internet-based services of the Federal Government are developed and presented separately, according to the jurisdictional boundaries of an individual department or agency, rather than being integrated cooperatively according to function.
  - (4) Internet-based Government services involving interagency cooperation are especially difficult to develop and promote, in part because of a lack of sufficient funding mechanisms to support such interagency cooperation.
  - (5) Electronic Government has its impact through improved Government performance and outcomes within and across agencies.

| 1  | (6) Electronic Government is a critical element       |
|----|---|
| 2  | in the management of Government, to be imple-         |
| 3  | mented as part of a management framework that         |
| 4  | also addresses finance, procurement, human capital,   |
| 5  | and other challenges to improve the performance of    |
| 6  | Government.   |
| 7  | (7) To take full advantage of the improved Gov-       |
| 8  | ernment performance that can be achieved through      |
| 9  | the use of Internet-based technology requires new     |
| 10 | leadership, better organization, improved interagency |
| 11 | collaboration, and more focused oversight of agency   |
| 12 | compliance with statutes related to information re-   |
| 13 | source management.                                    |
| 14 | (b) Purposes.—The purposes of this Act are the fol-   |
| 15 | lowing:   |
| 16 | (1) To provide effective leadership of Federal        |
| 17 | Government efforts to develop and promote elec-       |
| 18 | tronic Government services and processes by estab-    |
| 19 | lishing an Administrator of a new Office of Elec-     |
| 20 | tronic Government within the Office of Management     |
| 21 | and Budget.   |
| 22 | (2) To promote use of the Internet and other          |
| 23 | information technologies to provide increased oppor-  |
| 24 | tunities for citizen participation in Government.     |

| 1  | (3) To promote interagency collaboration in             |
|----|---|
| 2  | providing electronic Government services, where this    |
| 3  | collaboration would improve the service to citizens by  |
| 4  | integrating related functions, and in the use of inter- |
| 5  | nal electronic Government processes, where this col-    |
| 6  | laboration would improve the efficiency and effec-      |
| 7  | tiveness of the processes.                              |
| 8  | (4) To improve the ability of the Government to         |
| 9  | achieve agency missions and program performance         |
| 10 | goals.  |
| 11 | (5) To promote the use of the Internet and              |
| 12 | emerging technologies within and across Government      |
| 13 | agencies to provide citizen-centric services.           |
| 14 | (6) To reduce costs and burdens for businesses          |
| 15 | and other Government entities.                          |
| 16 | (7) To promote better informed decisionmaking           |

| 18 | (8) To promote access to high quality informa-          |
| 19 | tion and services across multiple channels, available   |
| 20 | to customers through the channels which are pre-        |
| 21 | ferred by the customer.                                 |
| 22 | (9) To make the Federal Government more                 |
